Technical Skills

React.js, Next.js, React Native, Node.js, Express.js, MongoDB, **Redis, RESTful APIs**, Microservices, Event-Driven Architecture, Socket.IO, **Docker**

JavaScript, **TypeScript**, Git, GitHub, Vercel, Firebase, Supabase, Large Language Models (LLMs), UI/UX Design, Figma, C++, HTML, CSS

Experience

Indori Coders - Software Development and Technical Training Company

June 2025 – Present

Software Engineer – MERN and React Native

On-site

- Developed and deployed scalable web and mobile applications using React, Next.js, and React Native, integrating APIs for seamless functionality.
- Built and optimized secure, high-performance RESTful APIs for microservices, ensuring robust performance, scalability, and reliable data handling.
- Designed and implemented responsive, user-centric interfaces (web, email, and mobile), improving usability, personalization, and cross-device compatibility.

Technobren Infotech Pvt. Ltd. – Outsourcing and IT Services

July 2025 – Sept 2025

Frontend Engineer – Next.js

Remote

- Contributed to the development of an Africa-based music streaming application, focusing on frontend implementation and user experience enhancements.
- Integrated REST APIs and backend services for music content, authentication, playlists, real-time user interactions and improved application performance,
- Collaborated with remote teams and clients to deliver production-ready features aligned with business and user requirements.

Projects

AI-powered travel planning app | *React Native, TypeScript, Redux Toolkit, Amadeus API*

April 2025

- Developed a cross-platform React Native app with Redux Toolkit, enabling AI-powered travel planning for browsing, price comparison, and booking flight, hotels, transport, etc.
- Integrated RESTful APIs from FastAPI and Node.js/Express microservices into the mobile client for seamless real-time data flow.
- Optimized mobile performance, UI responsiveness, and scalability, applying modern API integration and event-driven best practices.

Peer support community platform | *React.js, Node.js, Express.js, Firebase, Socket.IO, Agora*

January 2025

- Developed Togetherable, an accessible peer support platform for individuals with disabilities, enabling community creation, group discussions, and AI-powered assistance.
- Integrated real-time Text-to-Speech (TTS) and Speech-to-Text (STT), AI sentiment analysis, voice commands, and group audio/video chat for seamless communication.
- Utilized React.js, Node.js, Firebase, MongoDB, Socket.IO, and Agora SDK to build a scalable, real-time, and inclusive web application.

API testing platform | *Next.js, TypeScript, MongoDB, ShadCN UI, Acertanity UI*

April 2025

- Developed a web-based API testing platform with support for GET, POST, PUT, DELETE requests, collection management, and custom headers/body—similar to Postman.
- Designed a fast, responsive, and SEO-optimized UI using ShadCN and Acertanity UI, ensuring high performance and accessibility.
- Implemented data persistence with MongoDB and gained practical experience with Next.js routing, TypeScript, and modern web performance practices.
